

COMMON SENSE CURE

PYRAMID PILE CURE CURES PILES PERMANENTLY BY CURING THE CAUSE.

Remarkable Remedy Which is Bringing Comfort to Thousands of Sufferers.

Probably half the people who see this article suffer from piles. It is one of the commonest diseases and one of the most obstinate. People have it for years and just because it is not immediately fatal they neglect it. Carelessness causes no end of suffering. Carelessness about so simple a thing as piles has often caused death. Hemorrhages occur from no apparent cause and loss of blood causes death. Hemorrhages occur during surgical treatment, often causing death.

Piles are simple in the beginning and easily cured. They can be cured even in the worst stages, without pain or loss of blood, quickly, surely and completely. There is only one remedy that will do it—Pyramid Pile Cure.

It allays the inflammation immediately, heals the irritated surface and with continual treatment reduces the swelling and puts the membranes into good, sound, healthy condition. The cure is thorough and permanent.

Here are some voluntary and unsolicited testimonials we have lately received: Mrs. M. C. Hinkley, 601 Mississippi St. Indianapolis, Ind., says: "Have been a sufferer from the pain and annoyance of Pile for fifteen years, the Pyramid Pile Cure and Pyramid Pills gave me immediate relief and in a short time a complete cure."

Major Dean, of Columbus, Ohio, says: "I wish to add to the number of certificates as to the benefits derived from the Pyramid Pile Cure. I suffered from piles for forty years and from itching piles for twenty years and two boxes of the Pyramid Pile Cure has effectually cured me. Most druggists sell Pyramid Pile Cure or will get it for you if you ask them. It is one dollar per package and is put up only by the Pyramid Drug Co., Albion, Mich."

Not a Patent Medicine, But a Safe Cure for All Forms of Indigestion.

The results of recent investigation have established, beyond question, the great value of the new preparation for indigestion and stomach troubles; it is composed of the digestive acids, pepsin, bismuth, Golden Seal and similar stomachics, prepared in the form of 20 grain lozenges, pleasant to the taste, convenient to carry when traveling, harmless to the most delicate stomach, and probably the safest, most effective cure yet discovered for indigestion, sour stomach, loss of appetite and flesh, nausea, sick headache, palpitation of the heart, and many symptoms arising from imperfect digestion of food. They cure because they cause the food to be promptly and thoroughly digested before it has time to sour, ferment and poison the blood and nervous system.

Judge Frank Ives, of District Court of Crookston, Minn., says: "For some time I have used Stuart's Tablets with seeming great benefit, given few exceptions, I have not been so free from indigestion in twenty-five years."

George W. Roosevelt, U. S. Consul to Brussels, Belgium: "Stuart's Dyspepsia Tablets, safe, pleasant to take, convenient to carry, given keen appetite, perfect digestion."

Mr. W. D. Tomlin Mechanical Engineer, Duluth, Minn.: "One box of Stuart's Dyspepsia Tablets has done its work, and I am again gaining in flesh and strength."

O. E. Ransom, Hustonville, Ky.: "I was distressed and annoyed for two years with throwing up food, often two or three times a day. I ate one. Four boxes of the tablets from my druggist have fully cured me. I find them pleasant to take, convenient to carry."

Rev. G. D. Brown, Mondovi, Wis.: "The effect of Stuart's Dyspepsia Tablets is simply marvelous: a quite hearty dinner of bread and meat, which used to distress me, I began to eat now."

Over six thousand people in the state of Mich. alone in 1894 were cured of stomach troubles by Stuart's Dyspepsia Tablets.

Small packages may be found at all druggists at 50c, or sent by mail on receipt of price from Stuart Co., Marshall, Mich.

The audience was beyond doubt the largest that ever assembled in any of the school rooms of Nimishillen township.

FOR MARCH, APRIL AND MAY!

Paine's Celery Compound the Best Spring Remedy Today in All the World.

It Purifies the Blood as Nothing Else Can Do--It is Food for the Tired Brain--It Makes Strong Nerves!

Publicly Recommended as No Remedy of Any Kind Ever Was Before by Thousands Whom It Has Made Well.

Endorsed and Prescribed by the Ablest Physicians in Every City in America.

Where every other remedy has failed Paine's celery compound has made people well! It cures disease! It has saved the lives of thousands of sufferers. It has made the weak strong. Paine's celery compound purifies the blood as nothing else can do; it is nature's brain food; it builds up shattered nerves; it is pre-eminently the one great health-maker known to medicine.

First discovered after laborious, scientific research by the ablest physician America has produced, Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth College, it is prescribed and publicly endorsed by the best practitioners in every city of America. It has been so enthusiastically recommended by grateful men and women in every walk of life that it is today in every

sense the most popular remedy in the world. It has proven itself so easily the greatest of all spring medicines, banking the weak strong and the infirm well, that in the big cities, New York, Chicago, Philadelphia, Boston, St. Louis and the rest, the leading newspapers, making their own canvasses again this year, have found that the demand for Paine's celery compound has far surpassed that of all other remedies as the curative power of this great compound surpasses that of all others together!

Paine's celery compound, taken during the early spring days, has even more than its usual remarkable efficacy in making people well. It makes short work of all diseases of debility and nervous exhaustion. It rapidly drives out neuralgia, sleeplessness, dyspepsia and rheumatism from the system. It removes that lassitude, or "tired feeling," which betokens weakened nerves and poor blood.

Overworked and tired women are but one class of persons who are in urgent need of this wonderful remedy to make and keep them well. Business men who are not sleeping soundly, shop girls made pale and sickly by long hours of indoor work, and the countless sufferers from dyspepsia, kidney and liver troubles, need the invigorating effect of Paine's celery compound now, that spring, with all its dangers, is at hand. Its pre-eminence as a health-maker comes from its extraordinary powers of supplying appropriate nutriment to the blood, nerves and brain.

Just as the great lawyer studies each one of his cases till he knows it on every side, and in every possible aspect, so Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth College, the discoverer of Paine's celery compound, had studied the nerves in health and disease, and knew that lassitude, or "tired feeling," well nourished and when under normal conditions, in men and women and children, years before he looked for the remedy. Paine's celery compound was the outcome of his entire professional life. A

fitting memorial to a life of hard study and close observation—a remedy that the world could not lose today, at any price!

Take advantage of the remarkable power of this greatest of all remedies for restoring vigor to the blood and strength to the nervous system. In these first days of spring one has every chance for getting well. Don't neglect it.

Paine's celery compound calms and equalizes all the nervous tissues and it purifies the blood, as is so clearly shown by the rapid clearing of the skin of all evidence of bad humors within. It is an infallible relief for salt rheum, eczema, and all blood diseases.

Physicians recognize Paine's celery compound as the one scientific spring remedy, and it is universally prescribed by them wherever there is great need of a vigorous and prompt restoring of health and strength to the worn-out system.

BY THE WAY.

The following paragraph is extracted from a Kansas letter to the Boston U. S. Investor:

The new Kaffir corn, of which 188,000 acres were raised this year, has proved a boon to farmers, as it has thrived in hot, dry weather, and sandy soil as well as apparently as if conditions were more favorable. By some it is considered the salvation of the semiarid region, as it produces liberally, and the grain is excellent for food as well as a satisfactory feed and meal basis. The farmers are trying now to find an agriculture adapted to the climate and soil rather than to force the old methods, and indications point to success. Had they adopted this plan years ago the prairie states would be far advanced compared with present conditions.

A BICYCLE THIEF.

A certain news agency had telegraphed abroad the report that I am in Switzerland, not for the benefit of my health, but for the purpose of stealing bicycles, and they added that I was an expert thief, and, for a time at least, I had succeeded in baffling the most praised attempts of the police of two towns to capture me.

While this statement is naturally flattering to me it is nevertheless a libel, and, in fact, if I cared to use strong language I might go so far as to take the last syllable away from the word "libel."

The whole trouble arose through Switzerland not having a proper language of its own, that hilly country preferring to express what few thoughts it has in a mixture of French, German and Italian, depending on what particular canton you happen to be in. They say that the Swiss are natural linguists. Unfortunately they are. Any combination of sounds you may make means something to any Swiss to whom you happen to be talking, for he knows so many languages that you are sure to hit one of them, and so you convey ideas in him that you had no thought of expressing.

October weather is lovely in Switzerland. Most of the visitors have then gone, prices come down one-half, and the air is sweet and cool, with usually a cloudless sky.

Under these circumstances I thought it would be a nice thing, as the roads were good and the scenery picturesque, to take a bicycle tour right around Lake Thun, beginning at the town which gives the lake its name, going around the north side of the lake to Interlaken and returning by the south shore.

The hotel keeper told me that if I went up the street, turned to the right, went under an arcade until I came to a tunnel, penetrated that and emerged on another street, turned to the left and kept on I would come to the shop of a man who would let me have a bicycle on hire by the day or the hour. I followed the directions as closely as possible and thought I recognized the shop because a bicycle was leaning against the wall. The owner was leaning against the doorway, looking at the bicycle outside. The following conversation in many languages took place between us:

"Haben sie un bicyclette a louer?" I opened on him with the above impartial mixture of German and French. It seems he understood me to ask if that was his bicycle, whereupon he replied in four languages:

"Yaw, yaw, oui, yes, so."

Then, throwing in a bit of Italian, I led off with:

"Quanta costa la machine a la hour, oder per tag?"

Now, I submit that to any educated person, or even to a university man, this sentence said as plainly as print,

"How much does your machine cost for the hour or the day?" I tried afterward to get the magistrate to see this, but he, not knowing Italian, shied at the very beginning of the phrase. The owner of the bicycle on oath declares that he thought I asked how much the bicycle had cost him. He says that he answered he paid 500 francs for that brute of a machine, made in France, while I understood him to agree to let me have it for 5 francs a day, which was cheap. I was in a hurry to be off and was afraid he might regret his offer, so I said it was all right, and I would take it, whereupon, without further parley, I wheeled the bicycle into the middle of the road, sprang on its back and was off, leaving the astonished man standing by his door, too thunderstruck, it seems, to make any outcry until I had passed beyond his sight at the first turning of the road.

I pedaled serenely on, little realizing what a commotion I had left behind me, and the one funny thing about this most respectable episode was that I spent an exceedingly quiet, peaceful and enjoyable day, not knowing I was pursued, making no attempt to elude anybody and yet eluding them in what appeared afterward to be by subtle and crafty dodges. The magistrate could not be persuaded that my sitting on the veranda of a restaurant in the main street of Interlaken, with the bicycle
